Phone: +639760934889

LinkedIn: [linkedin.com/in/joshua-samar-34738825](https://www.linkedin.com/in/joshua-samar-34738825)

Language: English, Filipino

Address: Bulacan, Philippines

Professional Summary

Registered Electrical Engineer with strong experience in MEP electrical design, BIM modeling, and project coordination. Skilled in Revit Electrical Design, AutoCAD MEP, Evolve, Navisworks Manage with BIM 360, and Bluebeam Revu for system design, estimation, and coordination of commercial, industrial, and utility projects. Proficient in developing precise electrical layouts and documentation aligned with NEC, IEC, and IEEE standards. Dedicated to ensuring technical accuracy, design efficiency, and multidisciplinary coordination in every project.

EDUCATION

Bachelor of Science in Electrical Engineering

Bulacan State University | Malolos Bulacan, Philippines

Graduated: September 2020

Professional Credentials

Registered Electrical Engineer

Republic of the Philippines • Professional Regulation Commission

Regular IEEE Member

Institute of Integrated Electrical Engineers of the Philippines Inc. • Metro Manila, Philippines

Certifications & Skills

Revit MEP Electrical Masterclass - From Beginner to Advanced

Revit MEP - Sanitary - Pipe Design and Revit 3D Modeling

Revit MEP - Fire Protection System - MEPF

Revit MEP - Domestic Water and Under Floor Heating Pipes

Revit MEP - HVAC - Duct Design, Revit 3D Modeling

Revit MEP - Heating and Cooling Pipework – HVAC

AutoCAD MEP – 2D/3D Electrical and Mechanical System Drafting

Evolve 9 for Revit – Electrical BIM Fabrication and Coordination

Bluebeam Revu – Digital Documentation and Markup

Navisworks Manage with BIM 360 – Coordination, Clash Detection, and Model Review

Technical Skills

Electrical Design & Analysis: Power Distribution, Load Calculations, Circuit Protection

Programming & Automation: Arduino Uno, Raspberry Pi, C/C++ and Python scripting

Project Skills: BIM Coordination, Estimation & Costing, Documentation, Clash Detection, 3D modelling

Others: Technical Reporting, Client/Vendor Coordination, Safety Compliance

Professional Experience

MEPF Designer | BESCO

Knoxville, TN · Remote | July 2025 – Present

- Develop and coordinate detailed electrical models using Revit with Evolve add-in within Autodesk Construction Cloud (ACC)
- Perform clash detection and coordination review in Navisworks to resolve issues across trades.
- Apply Bluebeam markups and design revisions to maintain model accuracy and documentation consistency.
- Review and integrate Bluebeam markups, Procore updates, and field redlines into Revit models for accurate design documentation.
- Collaborate with engineers and BIM teams through ACC and Procore for real-time issue tracking, design updates, and model coordination.
- Ensure all electrical layouts comply with project standards, NEC, and construction requirements.

Electrical Engineer | Cargill

Bulacan, PH · Onsite | September 2022 – July 2025

- Designed and optimized electrical control systems to improved efficiency and reliability
- Collaborated with operations teams on automation and process improvements.
- Ensured compliance with safety standards and performed system testing and troubleshooting.
- Prepared technical reports, drawings, and documentation for project execution.

Quality Control Engineer | NW Steel Technologies

Bulacan, PH · Onsite | July 2021 – January 2022

- Developed and implemented quality processes and standards for inspections, evaluations, and testing
- Monitored and analyzed quality control performance to ensure compliance
- Documented data on material and product quality and reliability
- Investigated and resolved product or process issues.

Internship | Cargill

Bulacan, PH · Onsite | June 2019 – July 2019

- Create and review electrical schematics, wiring diagrams, and panel layouts under supervision.
- Observed and learned about installation, testing, and commissioning of electrical components.
- Gained hands-on experience in PLC programming, SCADA systems, and power protection relays.
